Summary

Full-Stack Developer skilled in creating seamless user experiences and robust backend solutions. Passionate about learning, collaboration, and driving impactful projects

Education

Indian Institute of Technology, Tirupati 2019-2023
Bachelor of Technology (BTech) in Chemical Engineering Tirupati, Andhra Pradesh

- **Relevant Coursework:** Web Development (React.js, Django), Python Programming, Object Oriented Programming, Data Structures and Algorithms (C++)

Experience

AIML Analytics Solutions Pvt Ltd (OpenDataFabric) Sep 2023 – Present
Frontend Developer Bangalore, Karnataka

- Developed responsive, modular components using React.js and TypeScript, improving code maintainability and ensuring type safety across multiple projects, reducing runtime errors by 50%.
- Integrated REST APIs and AWS Cognito for enhanced authentication and security, reducing unauthorized access incidents by 40% and improving application functionality, resulting in a 25% increase in user satisfaction.
- Implemented Zustand: Replaced Redux with Zustand for state management, reducing code by 30% and improving application performance.
- TanStack React Query: Improved data fetching efficiency and reducing API call complexity, leveraging features like automatic caching and background refetching, resulting in a 25% decrease in API response times.

Projects

Internal Management and Analytics Platform for App | *React.js, Typescript, Tailwind, REST APIs*

- Built an internal tool to centralize customer data management and monitor app performance, reducing data retrieval times by 50% and providing real-time analytics through comprehensive dashboards.
- Improved operational efficiency by 35% through streamlined data management and enhanced decision-making.

Template Management Platform | *React.js, Typescript, Tailwind, APIs*

- Created a template management platform using React.js, enabling efficient creation and management of Email, WhatsApp, SMS, and IVR templates, reducing template creation time by 60%.
- Implemented dynamic real-time preview functionality, improving user experience and content accuracy by 30%, ensuring faster iterations during communication design.
- Integrated robust backend API endpoints for seamless communication with external systems, supporting all channels (Email, SMS, WhatsApp, IVR). Applied RESTful API principles to ensure secure and efficient data exchange between the frontend and backend.

Financial Data Management and Visualization Platform | *React.js, Typescript, AWS-Cognito, AWS S3*

- Developed an advanced tool for businesses to upload, process, and visualize financial data through a multi-stage validation and verification process, reducing processing errors by 25%.
- Implemented functionality for uploading various financial data files, including assignments, financial records, payments, and loan tapes, enabling a 30% increase in processing speed Integrated AWS S3 for secure and scalable file storage.

Skills

Languages: HTML5, CSS3, JavaScript, TypeScript, Python, C++, SQL
Technologies: React.js, Next.js, Django, AWS Cloud, PostgreSQL, RESTful APIs, Zustand, Git and Version Control, Tailwind, Shadcn UI, Material UI Bootstrap, Figma, Postman, Visual Studio Code
Concepts: Dom Manipulation, Performance Optimization, State Management, Responsive Web Design, Chrome Dev Tools, Operating System, Virtual Memory, Cache Memory, Encryption, Decryption, API, Database, Cloud Computing
